OM UPADHYAY

Pune, Maharashtra | omupadhyay611@gmail.com | +91-9834407323 | linkedin.com/in/om-upadhyay-467683268 | github.com/Om-Upadhyay | https://om-resume-17.vercel.app

ABOUT ME

Final-year CSE (Artificial Intelligence & Analytics) student with strong foundations in Java, Python, C/C++, JavaScript, Data Structures & Algorithms, Object-Oriented Programming, and software development. Hands-on experience building modular applications, debugging workflows, working with APIs, and applying analytical problem-solving to real-world projects.

EDUCATION

MIT School of Computing *2023 – 2027*

B. Tech, Computer Science & Engineering (Artificial Intelligence & Analytics) | CGPA: 7.90/10.0

Relevant Subjects: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Machine Learning, NLP, Computer Vision, Artificial Intelligence

SKILLS

Programming Languages: Java, Python, C/C++, JavaScript, SQL

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Machine Learning, NLP, Computer Vision

Web & Backend: Flask, Node.js, REST APIs, MySQL, HTML, CSS, JavaScript

Tools & Platforms: Git, GitHub, Jupyter Notebook, Power BI, Tableau, Weka

EXPERIENCE

Data Analyst Intern *Jun 2025 – Jul 2025*

Ashok Leyland Ltd. (Automotive)

- Analysed an automotive engine-health dataset using Python and Pandas, troubleshooting data-quality issues including missing values, outliers, and inconsistent patterns while identifying factors affecting engine health.
- Applied preprocessing, feature analysis, regression, and clustering techniques to solve analytical problems, identify patterns, and support data-driven conclusions.

PROJECTS

AI Voice Assistant (RAJ) *Jan 2026 – Apr 2026*

Python, NLP, Computer Vision, REST/API Integration | GitHub Repo: github.com/Om-Upadhyay/RAJ-assistant-

- Developed a modular Python desktop application integrating speech recognition, NLP-based command processing, text-to-speech, computer vision, APIs, and system-level functionality.
- Implemented and tested application-control, web-search, system-monitoring, reminder, notes, and desktop automation workflows, requiring structured problem solving and troubleshooting.
- Technologies: Python, Vosk, SpeechRecognition, OpenCV, Sentence-Transformers, Flask/API Integration.

NLP-Driven System for Automated DSA Answer Evaluation *Aug 2024 – Apr 2025*

Python, NLP, Machine Learning, Flask, MySQL | Mentor: Dr. Prof. Jayashree Rajesh Prasad

- Built a web-based application to automatically evaluate Data Structures & Algorithms answers using NLP, transformer-based semantic similarity, and keyword extraction.
- Designed and tested the evaluation workflow on structured datasets, tuning ML/NLP components and achieving 80% evaluation accuracy against human-graded responses.
- Technologies: Python, Transformers, Pandas, Scikit-learn, Flask, MySQL, HTML/CSS.

CERTIFICATIONS

- AWS Academy Graduate — Cloud Foundations (Score: 91.35/100), AWS Academy
- Data Analytics Job Simulation (Score: 100/100), Deloitte — data interpretation, business analysis, reporting & insights

ACHIEVEMENTS & INTERESTS

- Taekwondo practitioner (co-curricular).
- Interests: Dancing, Music, Biking.
